+91 81694 76003 | yashkasle@gmail.com | github.com/BuildnByte | Mumbai, India

Education

Vidyalankar Institute of Technology (VIT) — Mumbai, India
B.Tech in Computer Engineering (CGPA: 9.89 / 10.0) — *2023 – 2027*

Kishinchand Chellaram College — Mumbai, India
Higher Secondary Certificate (HSC) – 86.17% — *2021 – 2023*

SSL English School — Mumbai, India
Central Board of Secondary Education (CBSE – 10th) – 91.80% — *2021*

Technical Skills

Languages: Java (Strong in DSA & OOPs), Python, JavaScript, HTML/CSS, SQL
Web Development: React, Node.js, Express, Django
AI/ML Concepts: Classification, Regression, Rule-Based Systems
Databases & Tools: PostgreSQL, MongoDB, SQLite, Supabase, Git, GitHub

Experience

Rajyog Health and Fitness — Mumbai, India
Backend & AI Intern — *May 2026 – July 2026*

- Built the backend for the Activity Monitoring and Diet Optimization module using FastAPI and Supabase PostgreSQL.
- Added a trained YOLO model (`best.pt`) to the backend API to identify food items from images for diet logging.
- Created REST APIs and database tables to save daily user activities and food logs.
- Wrote logic in the backend to calculate daily calorie intake and track main nutrients.
- Made a rule-based diet setup to generate daily and weekly food summaries for users.

Projects

SpotFix | *React, Node.js, Express, Python, MongoDB* — 2026

- Built a campus issue reporting website that notifies staff and escalates unsolved problems in real time.
- Created the backend using Node.js and Express, adding user login and role permissions with JWT.
- Connected a Python ML script to rank reported issues by priority based on student upvotes.

Fitness Tracker & Adviser | *Django, Scikit-Learn, Joblib, Firebase* — 2025

- Made a health advice web app with custom fuzzy logic (`fuzzy_logic.py`) to check user fitness data and sleep hours.
- Saved and loaded Scikit-Learn models using Joblib to predict health states and generate diet and workout plans.
- Wrote backend scripts (`generate_weekly_plans.py`) to automatically create weekly routines for users.

Exam Supervisor Allotment System | *Flask, PostgreSQL, Pandas, Python* — 2026

- Built an automated web app for college staff to assign teachers to exam rooms.
- Wrote an algorithm to schedule duties while checking room capacity, teacher availability, and rules.
- Linked the logic to a Flask backend and PostgreSQL database to save schedule records.

Achievements

- **TCS CodeVita Season 13 Qualifier**: Received a certificate for Global Rank 17,146; 1 of 3 students selected from college.
- **1st Place, Biomedical in Borderland**: Won first prize in an intercollege coding and problem-solving competition (2025).
- **Problem Solving**: Solved 300+ problems on LeetCode mostly in Java, and 95+ problems on HackerRank.

Certifications & Coursework

- **The Complete Full-Stack Web Development Bootcamp** – *Udemy (Angela Yu)* (2026)
- **Full Stack Web Development with Django** – *L&T Skill Trainers Academy* (2025)
- **Mathematical Foundations of CS (CIS 1600)** – *University of Pennsylvania by Prof. Rajiv Gandhi* (2024)
- **TCSiON Career Edge Young Professional** – *TCS* (2024)
